

Scikit-Learn Classification & Regression Cheat Sheet

Classification Models

Module	Model	Import
neighbors	KNeighborsClassifier	from sklearn.neighbors import KNeighborsClassifier
neighbors	RadiusNeighborsClassifier	from sklearn.neighbors import RadiusNeighborsClassifier
linear_model	LogisticRegression	from sklearn.linear_model import LogisticRegression
linear_model	RidgeClassifier	from sklearn.linear_model import RidgeClassifier
linear_model	Perceptron	from sklearn.linear_model import Perceptron
svm	SVC / LinearSVC / NuSVC	from sklearn.svm import SVC
tree	DecisionTreeClassifier	from sklearn.tree import DecisionTreeClassifier
ensemble	RandomForestClassifier	from sklearn.ensemble import RandomForestClassifier
naive_bayes	GaussianNB / MultinomialNB / BernoulliNB	from sklearn.naive_bayes import GaussianNB
neural_network	MLPClassifier	from sklearn.neural_network import MLPClassifier

Regression Models

Module	Model	Import
linear_model	LinearRegression	from sklearn.linear_model import LinearRegression
linear_model	Ridge / Lasso / ElasticNet	from sklearn.linear_model import Ridge
linear_model	SGDRegressor	from sklearn.linear_model import SGDRegressor
neighbors	KNeighborsRegressor	from sklearn.neighbors import KNeighborsRegressor
svm	SVR / LinearSVR / NuSVR	from sklearn.svm import SVR
tree	DecisionTreeRegressor	from sklearn.tree import DecisionTreeRegressor
ensemble	RandomForestRegressor	from sklearn.ensemble import RandomForestRegressor
neural_network	MLPRegressor	from sklearn.neural_network import MLPRegressor

Notes:

- LogisticRegression is for classification, not regression.
- LinearDiscriminantAnalysis is classification only.
